

HARRISON M. SMITH

AI Engineering | Data & Business Intelligence | Customer Enablement Background
Utah | (801) 657-0896 | hello@harrisonsmith.ai | [linkedin.com/in/hsmith-dev](https://www.linkedin.com/in/hsmith-dev)

PROFESSIONAL SUMMARY

Applied AI builder and Business Intelligence Analyst with 10+ years across data analytics, software, IT services, and technical training. At a Series A payments SaaS company, works alongside the AI engineering team to ground, extend, and evaluate an internal LLM assistant on the enterprise data lake. Independently builds a multi-model agent orchestration platform that connects non-technical users to AI tools through MCP servers. Holds an M.S. in Applied Artificial Intelligence with a capstone involving model fine-tuning, and brings a customer enablement background that turns complex AI capabilities into tools people adopt.

Core strengths: LLM Application Development • Agent Orchestration & MCP • Context Engineering & Grounding • Agent Evaluation • Data Pipelines & BI Reporting • Process Automation • Requirements Gathering • Training & Enablement

PROFESSIONAL EXPERIENCE

BlytzPay (Series A Payments SaaS)

Business Intelligence Analyst

Draper, UT

Nov 2025 – Present

- Collaborate with the VP of AI on the company's internal LLM assistant, slated for release as a customer-facing product, providing data expertise and grounding it on the enterprise data lake so it can answer business questions and generate reports from company data.
- Develop the assistant's persistent memories and deterministic logic paths, pairing LLM reasoning with rule-based components to make outputs consistent and repeatable.
- Build reports and data apps on the assistant's app framework, using AI-assisted workflows to speed up recurring and ad hoc BI deliverables.
- Building a customer-facing reporting studio that lets customers create their own reports from BlytzPay data and generate new views with the AI assistant.
- Built and maintain an evaluation framework for the AI agent, reducing tool-execution errors through systematic human-in-the-loop review, prompt refinement, and output validation.
- Spearhead restructuring of the enterprise data lake into a scalable medallion architecture, improving data reliability for analytics and preparing pipelines for AI and ML integrations.
- Partner with business stakeholders to gather requirements and deliver recurring and ad hoc reporting through complex Google BigQuery scripts and interactive Tableau dashboards.

HarrisonSmith.AI

AI & Software Engineer | Technical Consultant

Utah (Hybrid)

Feb 2025 – Present

- Engineer agentic AI tools and full-stack platforms, including multi-model orchestration, MCP integrations, and complex multi-step tool-use logic.
- Scope, build, and implement software solutions for businesses of all sizes, owning the full lifecycle from client requirements and concept through production-grade delivery.
- Deliver hands-on technical instruction and consulting for organizations including the PROG Development Center and Acord.AI, helping teams understand, integrate, and adopt AI tools and automated workflows.

Western Governors University

Subject Matter Expert (Contract)

Remote

Aug 2026 – Present

- Provide subject matter expertise to guide the development and technical review of curriculum for WGU's B.S. in Data Analytics with AI, ensuring content accuracy, technical rigor, and alignment with current industry practice.

Common Thread

Software & IT Services (Contract)

Mar 2024 – Present

- Provide SQL and software development services, supporting client technology and data needs.

Salt Lake Community College

Data Analyst Coordinator

Salt Lake City, UT

May 2025 – Nov 2025

- Developed and maintained reports and data visualizations using SQL and JavaScript, enabling stakeholders to make data-informed decisions.
- Analyzed labor market data to align training programs with regional career opportunities and employer needs.

Trainer (Workforce Training & Education; Verizon Innovative Learning)

May 2023 – Nov 2025

- Co-developed and piloted "AI @ Work," a prototype workforce training series on prompt engineering and practical AI integration, and served as lead instructor.

- Onboarded and trained fellow educators in the Verizon Innovative Learning program, ensuring consistent, high-quality delivery of technical curriculum.
- Taught courses in Artificial Intelligence, Robotics, and 3D Printing, building early technology literacy for teen learners.

Program Associate, IT & Computer Applications Aug 2024 – May 2025

- Served as liaison between students, instructors, and program managers, coordinating meetings, resolving inquiries, and managing expectations across groups.
- Scheduled courses and maintained enrollment records, ensuring accurate and timely data management.
- Supported marketing, outreach, and course updates to keep program offerings aligned with industry needs.

Teaching Assistant, IT & Computer Applications | Lab Aide II, IT Aug 2023 – Nov 2024

- Supported students with SQL, software development, and hands-on lab troubleshooting in an IT learning environment.

Instructure United States

Canvas Support Engineer Aug 2020 – Jun 2021

- Provided technical support to users of the Canvas learning management platform, troubleshooting issues and guiding customers to resolution in a SaaS environment.

Education at Work

Support, Microsoft Office Project (Part-time) Aug 2019 – Mar 2020

- Delivered customer support for Microsoft Office products, helping users resolve issues and get more value from the software.

Control4 Draper, UT

IT Services Analyst I Sep 2015 – Feb 2019

- Supported internal users and company systems through system administration, troubleshooting, and IT project work over 3.5 years.

Information Technology Intern | File Clerk (Part-time) Jun 2014 – Feb 2017

Murray High School – Assistant Tennis Coach (Seasonal) Jan 2018 – Jun 2023

AI SYSTEMS & TECHNICAL PROJECTS

- **Ogden AI Agents (Solo Developer):** Building a standalone multi-model orchestration app that routes work across Claude, Codex, Grok, and Gemini with built-in failover when provider usage limits are reached; connects to data and tools through MCP servers so non-technical users can build their own AI-powered apps.
- **Lorekeeper (M.S. Capstone):** Designed and built a capstone AI application that includes model fine-tuning.
- **Agent AI & LLM Orchestration Platform:** Engineered a full-stack JavaScript application integrating RAG architecture, local LLMs (Ollama, KoboldCpp), and hosted model APIs (Claude, Gemini, ChatGPT) to orchestrate complex, multi-step tool use.
- **ML Classification Pipeline & CI/CD:** Executed full-lifecycle model development (sanitization, ETL, training, evaluation) in Jupyter/ML.NET; as Capstone Engineer, built GitHub Actions pipelines deploying production builds to a live site.
- **Technical Lead, Nomad Alliance:** Led a data-driven prototype to track community needs, improving visibility for the state's official homelessness dashboard.

TECHNICAL SKILLS

AI & Machine Learning: LLM application development, multi-model orchestration and failover, Model Context Protocol (MCP), context engineering and grounding, agent memory, RAG architecture, agent evaluation, prompt engineering, model fine-tuning, multi-model API integration (Claude, Gemini, OpenAI, Grok), local LLM hosting (Ollama, KoboldCpp), TensorFlow, PyTorch, ML.NET

Data & Analytics: Google BigQuery, SQL (T-SQL, MySQL, PostgreSQL), Tableau, Power BI, medallion architecture, ETL pipeline design, data validation, MongoDB, Microsoft Office

Programming: Python (pandas, NumPy, scikit-learn), JavaScript, SQL, C#, C, C++, Java, Swift

Platforms & Tools: Git, GitHub Actions (CI/CD), Docker, Google Cloud Platform, Microsoft Azure, JIRA, Confluence, Linux, macOS, Windows

Customer & Business: Software implementation and adoption, customer training and onboarding, requirements gathering, stakeholder communication, project management, technical support, curriculum and playbook development

EDUCATION

M.S., Applied Artificial Intelligence – Neumont University, Salt Lake City, UT Sep 2026

- Capstone: Lorekeeper. Coursework: Machine Learning I & II, AI Tools and Practical Applications, Generative AI for Business Operations, Data Analysis, ETL/RAG architecture implementation.

B.S., Computer Science – Weber State University, Ogden, UT Dec 2022

- Completed graduate-level data science coursework as an undergraduate: data cleaning, predictive modeling, and mathematical frameworks.
